

Did u know that in Death Valley it is not unusual to reach higher than 100° Fahrenheit? This part of California is the hottest place in California.

The Mojave (mo-Ha-vee) cover large pieces of land both the Sierra Nevada and the Colorado river.

The deserts cover most of the southern land in Basin and the Range.

So as u can see the deserts in California are very fun and interesting to visit and u will see some interesting things if u get to hot.

The popular and really well known spot in California's mountain region is Yosemite

The weather is normally really cold in winter but easy gets hot in summer

Mount Whitney is one of the highest points in California

Cascade Mountains are special because

they were formed millions of years ago by volcanoes. Lava drizzled out

of the world's crust and hardened into mountains..

CALIFORNIANS REGIONS

CENTRAL VALLEY

The central valley is a good place to go get crops and corn. It is a rich farm area. I bet that there are a lot of farmers. There is also a lot of breezes. The central valley is between the coastal region The land sank when the mountains.

Coastal Region

The coast is one of the regions you will find in California. There is a Northern and Southern part of the California's coastal region. The Northern part of the California coastal region is cool and wet. The Southern part of the California region is sunny and hot. In conclusion, I hope that you will be able to visit the California coast.
